

Information Partners Can Use on:

Closing the Coverage Gap

The Affordable Care Act includes provisions to close the Medicare Part D prescription drug coverage gap (also called the “donut hole”) to make prescription drugs more affordable for people with Medicare.

People with Medicare who have Part D, but don’t get Extra Help (the low-income subsidy), will get a discount (50% in 2012) under the Medicare Coverage Gap Discount Program on brand-name drugs at the point-of-sale and an increase in coverage for all other covered Part D drugs (e.g., generic drugs and diabetic supplies) while they’re in the coverage gap.

Prescription drug coverage will continue to increase over the next several years for all covered drugs in the coverage gap so what people pay during the gap will continue to decrease until it reaches 25% in 2020.

How does the Medicare Coverage Gap Discount Program work for brand-name drugs?

Drug manufacturers must sign agreements with Medicare to participate in the Coverage Gap Discount Program. The agreement specifies that all of the manufacturers’ covered Part D brand-name drugs will automatically be discounted at the point-of-sale for coverage gap claims. **The discount doesn’t include the cost of the pharmacy dispensing fee.** The full cost of the drug will count as out-of-pocket spending for the purposes of reaching catastrophic coverage.

Example: Mrs. Anderson reaches the coverage gap. She goes to her pharmacy to fill a prescription for a covered brand-name drug. The price for the drug is \$60 and the dispensing fee is \$2. Once the discount (50% in 2012) is applied, the cost of the drug is \$30. The \$2 dispensing fee is added to the \$30 discounted amount. Mrs. Anderson will pay \$32 for the prescription, but the entire \$62 (both what Mrs. Anderson and the manufacturer pay) will count as out-of-pocket spending and will help Mrs. Anderson get out of the coverage gap.

How will the Medicare Coverage Gap Discount Program work for brand-name drugs? (continued)

If a drug manufacturer doesn't sign the agreement, its brand-name drugs won't be covered under Part D, and Part D sponsors won't be allowed to grant an exception or provide a transition for such drugs. People may still buy the drug at its full price, but the cost won't count toward getting into or out of the coverage gap. Part D plans will review coverage gap claims to determine the person's eligibility and if the drugs are eligible for the discount.

How has Medicare increased its coverage for all other Part D drugs?

Medicare has increased its standard coverage by paying a certain percent (14% in 2012) of the cost for all other non-brand name Part D drugs (e.g., generic drugs and supplies associated with the delivery of insulin) during the coverage gap, including the dispensing fee. This means people with Medicare who reach the coverage gap will pay 86% of the cost in 2012. Part D coverage will increase each year and the amount people pay **will decrease each year** until 2020, when the amount eligible people pay for these drugs will be 25% of the cost. The standard rules for calculating the person's out-of-pocket costs apply.

Example: Mrs. Anderson reaches the coverage gap. She goes to her pharmacy to fill a prescription for a covered generic drug. The price for the drug is \$20, and the dispensing fee is \$2. Once the 14% coverage is applied to the \$22, she will pay \$18.92 for the covered generic drug and only \$18.92 will be counted as out-of-pocket spending that will help Mrs. Anderson get out of the coverage gap.

Who is eligible for the savings while in the coverage gap?

People who meet all of the following criteria are eligible for discounts under the Medicare Coverage Gap Discount Program:

- They're currently enrolled in a Medicare Prescription Drug Plan (including people enrolled in employer group health and waiver plans), or a Medicare Advantage Plan (like an HMO or PPO) that includes prescription drug coverage.
- They don't get Extra Help (a Medicare program to help people with limited income and resources pay Medicare prescription drug costs).
- They've reached the coverage gap.

Note: Some people are in Medicare drug plans that don't have a coverage gap but they will still be eligible to get a discount on brand-name prescriptions once they reach the defined standard initial coverage limit (ICL). For 2012, the defined standard ICL is \$2,930.

How will someone know what discounts have been applied?

The Explanation of Benefits (EOB) notice, that people with Medicare receive, will show the amount of the monthly prescription drug costs funded by the manufacturers.

How do the discounts work if someone is enrolled in a State Pharmacy Assistance Program (SPAP)?

People with Medicare who are eligible for the discounts and enrolled in a State Pharmacy Assistance Program (SPAP), or any other program that provides coverage or financial assistance for Part D drugs (other than Extra Help), still get the discount on covered brand-name drugs in the coverage gap. The discount is applied to the price of the drug before any SPAP or other coverage.

What if someone gets discounts from a drug manufacturer?

Patient assistance programs offered by manufacturers don't have the same rules as SPAPs. People should check with the manufacturer to determine if their assistance program will change.

Does the discount apply to people who have enhanced Part D coverage?

Yes. A discount may be applied after their coverage has been applied to the cost of the drug. The discount will apply to the remaining amount they owe.

Example: Mrs. Anderson is in an enhanced Part D plan. Her plan has an enhanced brand-name drug benefit of 60%. After she reaches the initial coverage limit, she goes to her pharmacy to fill a prescription for a brand-name drug. The negotiated price of the drug is \$100. After the plan's benefits are applied (60% off of \$100 = \$40), the discount (50% in 2012) is applied to the remaining \$40 amount. Mrs. Anderson will pay \$20 for her prescription (plus any dispensing fee), but \$40 will count as out-of-pocket spending and help Mrs. Anderson get out of the coverage gap.

Also, if Mrs. Anderson is in a plan that offers coverage for generic drugs during the gap, she will get the additional generic drug coverage (14% in 2012).

Who is responsible for handling disputes if someone believes they should have received a discount but didn't?

Part D plans must handle inquiries and complaints about the Medicare Coverage Gap Discount Program. Individuals who think they should get a discount need to call their Part D plan. The plan's phone number is located on the individual's plan membership card. If the individual and drug plan disagree on whether a discount is owed, the individual may use the existing coverage determination and appeals process to resolve the dispute.

They can also call 1-800-MEDICARE (1-800-633-4227) to file a complaint. TTY users should call 1-877-486-2048.

Can someone file an exception for a drug if the manufacturer isn't participating in the Medicare Coverage Gap Discount Program?

No. If a manufacturer doesn't have an agreement with Medicare to participate in the Discount Program, no brand-name drugs labeled by that manufacturer will be covered under Part D. All other covered Part D drugs (e.g. generic drugs approved under abbreviated new drug applications, supplies associated with the delivery of insulin) by such manufacturers may continue to be covered by Part D plans. Most manufacturers that produce over 99% of the brand-name drugs used by people with Medicare participate in this program.

Can retroactive adjustments affect the discount?

Yes, if changes are made to an individual's eligibility or benefit it could affect the discount. These adjustments would be reported on the monthly Explanation of Benefits (EOB) notice. It will show the amount of the monthly prescription drug costs funded by the manufacturers. People should contact their plan if they think they are eligible for an adjustment.

What happens if only a portion of the claim is in the gap?

The discount will only apply to the portion of the claim that is in the coverage gap. For example, if someone fills a \$100 prescription when he or she is \$50 away from reaching the coverage gap, only the \$50 in the coverage gap is subject to the discount.

What additional discounts and savings will people with Medicare have over time in the coverage gap?

- In 2012, people with Medicare will pay 50% for covered brand-name drugs, and 86% of all other covered drugs.
- Over the next 10 years, the benefit will increase for all covered drugs so that people with Medicare will pay less in the coverage gap.
- By 2020, the coverage gap will close and people will pay only 25% for covered brand-name and generic drugs from the time they meet the deductible (if applicable) until they reach the out-of-pocket spending limit.
